Erik *et al.*...

I am out-of-the-office for meetings on Thursday September 5th. That leaves either Friday Sept. 6th (sometimes Fridays are bad days for meetings) or Monday September 9th. Chris B. will be most important Ohio EPA on call, Chris what is your schedule for Monday? Hopefully we can get a time arranged soon.

Carrie and Group,

I will be attending training both Tuesday and Wednesday (Sept. 3 & 4), and returning on Thursday. If the meeting is set for Thursday, please email me items for discussion and I will prepare as best I can.

Erik M. Bewley
Environmental Specialist
Division of Air Pollution Control
Ohio Environmental Protection Agency
(Direct) 330-963-1252
(Fax) 330-487-0769

If your address book currently has my email as erik.bewley@epa.state.oh.us please change it to erik.bewley@epa.ohio.gov In the coming months, the 1st address will no longer work.

Hello Paul –

Would it be possible to set up a phone call for next week, Wednesday or Thursday? Please let me know.

Thanks

Carrie

All:

I will be able to help regarding toxics evaluations, but Dr. Chris Beekman and /or Jeet Upadhyay will need to be consulted as far as the details of the modeling parameters and requirements. We can try to schedule a preliminary phone meeting next week if possible. Will look forward discussing these issues with you then.

Thank you for your help with this Michelle.

Ed, Erik, and Tim –

HTS would like to discuss the modeling request OEPA made to HTS during the 8/7/13 meeting. As mentioned in the email to Michelle, HTS has been talking with modeling experts and we do not think that the modeling will provide an accurate depiction of the deposition zone. So, HTS would like to speak with you. Could you provide several dates and times that work for OEPA? We can coordinate those dates with our folks to set up a call. We appreciate your time discussing this.

Sincerely

Carrie L Beringer

I discussed this with Natalie and Frank yesterday.

Natalie requested that you set this up with Ed Fasko (who is out today, back next week) and Erik Bewley, and Tim Fischer,

Subject: Discussion with OEPA on the Cal Puff modeling

Michelle –

As we discussed yesterday, HTS would like to speak with OEPA regarding the request to conduct air modeling on the 7/13/13 release. After speaking with technical experts regarding the 7/13/13 event, data available, event duration, modeling limitations, HTS does not believe the CAL Puff modeling will accurately represent the deposition zone of the 7/13/13 event. Could you set up a call between HTS and OEPA to discuss this issue?

Thanks
Carrie
